

SEVEN YEARS OF DESIGN RESEARCH AT POLITECNICO DI MILANO

Analysis of the funded research projects

edited by Francesca Rizzo

Direction: Silvia Piardi

Scientific Board:

**Alessandro Biamonti, Alba Cappellieri, Mauro Ceconello,
Claudio Germak, Ezio Manzini, Carlo Martino, Francesca Tosi,
Mario Piazza, Promil Pande, Angelica Ponzio, Zang Yingchun**

The Design International series is born in 2017 as a cultural place for the sharing of ideas and experiences coming from the different fields of design research, becoming a place in which to discovering the wealth and variety of design, where different hypotheses and different answers have been presented, drawing up a fresh map of research in international design, with a specific focus on Italian design.

Different areas have been investigated through the books edited in these years, and other will be explored in the new proposals.

The Scientific Board, composed by experts in fashion, interior, graphic, communication, product and industrial, service and social innovation design, interaction and emotional design, guarantee the high level of the accepted books. After the first selection by the Scientific Board, the proposals are submitted to a double review by other international experts.

Il presente volume è pubblicato in open access, ossia il file dell'intero lavoro è liberamente scaricabile dalla piattaforma **FrancoAngeli Open Access** (<http://bit.ly/francoangeli-oa>).

FrancoAngeli Open Access è la piattaforma per pubblicare articoli e monografie, rispettando gli standard etici e qualitativi e la messa a disposizione dei contenuti ad accesso aperto. Oltre a garantire il deposito nei maggiori archivi e repository internazionali OA, la sua integrazione con tutto il ricco catalogo di riviste e collane FrancoAngeli massimizza la visibilità, favorisce facilità di ricerca per l'utente e possibilità di impatto per l'autore.

Contents

1. State of the art of the competitive research projects of the Department of Design

<i>Francesca Rizzo</i>	pag.	9
1.1 Design as a research discipline in the context of EU funds	»	9
1.2 Basic and applied design research at the Department of Design	»	12
1.3 A deeper view on the sources of the funded projects from 2014 to 2020	»	15
1.4 Conclusions	»	18
References	»	20

2. Context of the analysis and methodology

<i>Ilaria Mariani, Patrizia Bolzan, Annalinda De Rosa, Venere Ferraro, Marzia Mortati, Xue Pei, Francesca Rizzo, Davide Spallazzo</i>	»	23
2.1 Phase 1: Project sample definition	»	24
2.2 Phase 2: Knowledge base development	»	25
2.3 Phase 3: Data extraction and interpretation	»	31
References	»	33

3. The funded projects of the Department of Design and their interactions with the basic design research

<i>Francesca Rizzo & Ilaria Mariani</i>	pag.	35
3.1 The basic design research landscape and the position of the Department of Design	»	35
3.2 Data collection and analysis	»	42
3.3 The topics of the funded research	»	45
3.3.1 The horizontal topics	»	45
3.3.2 The vertical topics	»	55
3.4 Continuity, discontinuity and interactions between the funded and the basic research of the Department of Design	»	62
3.5 Conclusions	»	66
References	»	67

4. The projects' outputs: the nature and their connection with outcomes and impacts

<i>Venere Ferraro & Patrizia Bolzan</i>	»	77
4.1 Defining the outputs of the funded research	»	77
4.2 Extracting the Data: outputs typologies, numbers and clusters	»	81
4.2.1 Clustering the outputs: a qualitative approach	»	82
4.3 Analysing the Data	»	86
4.3.1 Four exemplifying Case studies	»	92
4.4 Discussion and future trajectories	»	99
References	»	102

5. The projects' outcomes: the analysis of the results in the medium-term

<i>Davide Spallazzo & Annalinda De Rosa</i>	»	103
5.1 Framework	»	103
5.1.1 Methodology	»	106
5.2 The outcomes of the design research	»	110

5.2.1 Recognising the design research contribution (RQ2): looking for commonalities (RQ3)	pag.	114
5.3 Mapping the outcome inside and outside the Department	»	115
5.3.1 Mapping within the Department	»	116
5.3.2 Mapping in the national/European context	»	126
5.4 Discussion	»	130
5.5 Conclusions	»	131
References	»	132

6. The projects' impacts and trajectories: the relationship between research topics and impact pathways

<i>Marzia Mortati & Xue Pei</i>	»	133
6.1 Evaluating the impact of research	»	134
6.1.1 Research impact and evaluation models	»	134
6.1.2 Key Impact Pathways and related Indicators	»	138
6.2 Research design and methodology	»	144
6.2.1 Research objectives and questions	»	144
6.2.2 Research methodology and process	»	145
6.3 The relationship between research topics, impact categories and KIPs	»	147
6.3.1 The impacts of the funded research projects	»	147
6.3.2 The relationship between research topics, impact categories and KIPs	»	148
6.3.3 Relationship between research topics and KIPs	»	149
6.4 Strengths and weaknesses emerged in the analysis	»	155
6.4.1 Open questions	»	158
6.4.2 Limits of the analysis	»	159
References	»	182

7. Reflections on upcoming directions of design research

<i>Alessandro Deserti</i>	pag.	185
7.1 Interdisciplinary collaboration as a means of transformation	»	185
7.2 Change in the areas and objects of design	»	187
7.3 Reflections and trajectories for future work	»	193
References	»	195

Annex I.

Relationship between research projects, keywords, clusters, key impact pathways and impact categories

» 199

Annex II.

Projects' impact pathway sheets

» 219

Authors

Francesca Rizzo (editor), Ph.D. in Electronics and Telecommunications Engineering, is Professor at Politecnico di Milano, Department of Design where she serves as delegate of Director for the research activity. She is expert in Participatory Design (PD) applied to the fields of service design, social innovation, and public sector innovation. She has been actively working as researcher for various EU projects in the FP7 programme and in H2020 (Peripheria, My Neighborhood, Smart Campus, Life 2.0, SIC, SISCODE, easyRights, NetZeroCities). She will serve as coordinator of ORBIS under HEurope (2023-2026). She is author of many publications in journals and conference.

Patrizia Bolzan, Ph.D. in Design, is Researcher at the Department of Design of Politecnico di Milano. She investigates the ratio between digital fabrication, with particular attention on additive manufacturing technologies, and Design in practices and processes. She deals with circularity in product system design and technological integration in prototypes. She has participated in several research projects, and she is the coordinator of De-Forma (Design Explorations on Biofabricated Organic Materials) project, funded by the Department of Design, with the basic research grant. Since 2015 she has been on the permanent staff of Polifactory, interdepartmental makerspace and FabLab).

Alessandro Deserti is Professor in Design at the Politecnico di Milano, where he is currently leading the Department of Design. His main research lines deal with design-enabled innovation processes, methods and tools and ways in which they combine with systemic and organization change. He investigated the application of design methods and tools in diverse contexts, such as human smart cities, social innovation, responsible research, and in-

novation (RRI), public sector innovation (PSI), business model innovation. He has been actively working as researcher for various EU projects in the FP7 and in H2020. He is currently involved in DESIRE a HEurope project demonstrator for the New European Bauhaus initiative. He is author of many publications in journals and conference.

Annalinda De Rosa is Post-doc Research Fellow at the Department of Design of Politecnico di Milano; adjunct professor at the School of Design, and the MSc Innovation and Technology Management of Università Cattolica del Sacro Cuore. Her research concerns the relationship between spatial and service design, specifically focusing on design-driven models for incubating innovative processes for the CCS to improve social cohesion through participatory design in urban and rural areas. Member of the Polimi DESIS Lab within the international DESIS Network (Design for Social Innovation and Sustainability). She is the project manager of Human Cities/Smoties – Creative works with small and remote places research project (Creative Europe program).

Venere Ferraro, Ph.D. in Design, is an Associate Professor at the Department of Design of the Politecnico di Milano. She participated in several International and National research; she has been the coordinator of the research project “POD” (SAFERA 2014 joint call) and the European research project “DATEMATS” (KA2-2018). What characterizes her research is human-centred design. The research interests lie in the domain of interaction design, more in detail: the role of wearable technologies, emerging materials, and big data in designing experiential systems for digital care, with particular attention to tools and methods for changing user behaviour.

Ilaria Mariani, Ph.D. in Design, is Researcher at Politecnico di Milano, Department of Design, where she is part of the team supporting the research activity. Her research interests are at the intersection of interaction, communication, and service design. Her research addresses games and complex interactive systems for communication and speculation, social change and innovation, focusing on comprehending their impact on users. In recent years she moved her focus to digital transformation and design-led innovation in the public sector. She actively participates in various research projects on these topics, such as the H2020 SISCODE and easyRights, the CEF AI4GOV, the ESPON Digiser, and the HEU ORBIS.

Marzia Mortati, Ph.D., is Associate Professor in Service Design at the Department of Design of Politecnico di Milano. She is Vice-Director of the

International Master in AI for Public Services and one of the executive directors of the European Academy of Design. Her research focuses on the design process, service design, public sector innovation, and new technologies. She has worked on numerous international research projects and has authored several articles in international scientific journals (i.e., Design Issues, Technovation, Design Management Review, The Design Journal, Policy Science, International Journal of Entrepreneurial Research and Behaviour) and conferences since 2008.

Xue Pei is a Post-doc Research Fellow at the Department of Design of Politecnico di Milano, where she obtained her Ph.D. in design management. Her research and design practices focus on applying design (thinking) approach, methods, and tools to foster innovation in organisations in both private and non-profit sectors. She has developed expertise in design research, strategic scenario building, and service system design. She has participated in a number of European and national research projects (Horizon 2020, Interreg, Fondazione Cariplo), and co-led several strategic and service design research projects with private funding. She also conducts didactic activities in public universities and private institutions.

Davide Spallazzo has a Ph.D. in Design and is an Associate professor at the Department of Design of Politecnico di Milano. His research sets in the interaction design field, particularly in UX, aesthetics, and meaning-making. He has been coordinating research projects in the field of cultural heritage and serious gaming. In recent years he moved his attention to the intersection of AI and Design, coordinating the Meet-AI research project aimed at eliciting the design qualities of AI-infused products and defining a new UX assessment method. He is currently serving as deputy coordinator of the Ph.D. program in Design and as secretary of the MSc in Digital & Interaction Design at Politecnico di Milano.

Which are the main research funds currently accessed by the Department of Design? What are the topics explored through them and which are the interconnections with the Department core research activities? Also, what are the research products delivered, the reached outcomes, and the expected impacts BY these research projects?

The book synthesises the results of a qualitative analysis conducted over 32 research (out of 96) projects coordinated or participated in by the researchers of the Department in the timeframe 2014-mid 2021.

The results of the analysis confirm the high-level attractiveness of the Department research profile on core topics such as design methodology, service design, and health.

However, more interestingly, the analysis shows a significant variety of new topics and themes that emerge as new research questions for the Department, such as the role of design in public sector innovation, ethics, or policy design.

The publication provides a snapshot of the topics addressed through the competitive research projects, the dimension of such strands of investigations, the typology and features of results achieved, as well as their relationship to the Department's basic research lines.

The relationship and interplay among the outputs, outcomes, and impacts of the funded research is then elaborated in impact pathways, opening up reflections about the upcoming and future of Design research. The findings of the analysis aim to capture the present to understand future directions in terms of scientific, societal, technological and economic aspects.

The volume addresses an academic audience from long terms researchers the field of design and other closely related scientific-disciplinary fields at the national and international levels, to young researchers approaching the world of design research.
