Chapter three

113 **Interviews**
Appendix

135 **Essential reference list**

This book is a journey through the self-built houses of São Paulo (Brazil). These houses are considered an expression of the city's cultural identity and are documented through an integrated typo-morphological survey and analysis offering design hypothesis and guidelines.
Jardim Filhos da Terra is part of the research project *Spontaneous Living Spaces* for the documentation of places' culture of living siding other international case studies.
