PREFACE

It is with great pleasure that we present the proceedings of the International Conference on New Trends in Applied Sciences (ICONTAS'23). The conference was held virtually from December 1-3, 2023.

ICONTAS'23 aimed to bring together researchers, practitioners, and industry experts from around the world to exchange ideas and share their latest findings in the field of intelligent systems and their new applications. This conference provided an opportunity for attendees to discuss recent advancements, challenges, and future directions of intelligent systems research.

All paper submissions have been double blind and peer reviewed and evaluated based on originality, technical and/or research content/depth, correctness, relevance to conference, contributions, and readability. Selected papers presented in the conference that match with the topics of the journals will be published in the following journals:

- International Journal of Applied Mathematics, Electronics and Computers (IJAMEC)
- International Journal of Automotive Engineering and Technologies (IJAET)
- International Journal of Energy Applications and Technology (IJEAT)
- Intelligent Methods in Engineering Sciences (IMIENS)

At this conference, there were 62 paper submissions. Each paper proposal was evaluated by two reviewers. And finally, 30 papers were presented at the conference from 13 different countries. We would like to express our gratitude to all the authors who submitted their abstracts, as well as the members of the organizing committee, the technical program committee, and the reviewers for their hard work and dedication in making ICONTAS'23 a success.

We look forward to seeing you at next ICONTAS.
