

Design challenges in creative systems

THEORIES, METHODS AND PRACTICES
FOR SUSTAINABILITY AND INCLUSION

Edited by
Paola Cordera and Raffaella Trocchianesi

Design International series

DIRECTION

Silvia Piardi

SCIENTIFIC BOARD

**Alessandro Biamonti, Alba Cappellieri, Mauro Ceconello,
Claudio Germak, Ezio Manzini, Carlo Martino, Promil Pande,
Mario Piazza, Angelica Ponzio, Francesco Scullica,
Francesca Tosi, Yingchun Zang**

EDITORIAL BOARD

**Alessia Brischetto, Alessio Caccamo, Barbara Camocini,
Giuseppe Carmosino, Eugenia Chiara, Andrea Di Salvo,
Elena Elgani, Silvia Gramegna, Shashwat M. Pande,
Gustavo Alfonso Rincon, Fabiano Scherer, Daniela Selloni,
Davide Spallazzo, Livia Tenuta**

The Design International series was launched in 2017 as a place for cultural exchange between the different design souls. Over the years, the series has consolidated its position as a point of reference for international research, outlining a continuously updated research map. The Scientific Committee, consisting of experts in fashion, interiors, graphics, communication, product, service, social interaction, innovation and emotional design guarantees the level of the accepted texts. The Editorial Board, consisting of young experts in the different branches of design, supports the work of the scientific committee. After an initial evaluation by the two committees, the texts undergo international double revision.

FrancoAngeli

SERIES - OPEN ACCESS CATALOG

This volume is published in open access format, i.e. the file of the entire work can be freely downloaded from the FrancoAngeli Open Access platform (<http://bit.ly/francoangeli-oa>).

On the FrancoAngeli Open Access platform, it is possible to publish articles and monographs, according to ethical and quality standards while ensuring open access to the content itself. It guarantees the preservation in the major international OA archives and repositories. Through the integration with its entire catalog of publications and series, FrancoAngeli also maximizes visibility, user accessibility and impact for the author.

Contents

7	Preface Michele Trimarchi
17	Crafting tomorrow through the Design lens Paola Cordera, Raffaella Trocchianesi
	PART 1 TERRITORIES AND LOCAL DEVELOPMENT
25	1. On the post-war Italian design network: challenges for a 21st-century widespread heritage Paola Cordera
37	2. Design for cultural cooperation and sustainable tourism. Inclusive experience, accessible environments and heritage representation Giuseppe Amoruso, Polina Mironenko
51	3. Dialogues with the past_echoes in the future: cultural heritage and the transformation of buildings and cities Peter A. Di Sabatino
65	4. Reframing design for hospitality towards a cultural and sustainable approach to tourism Elena Elgani
	PART 2 MUSEUMS, EXHIBITIONS AND CULTURAL EXPERIENCE
79	5. Sustainability challenges of exhibition systems Raffaella Trocchianesi, Rossella Locatelli

93	6. Elevating inclusivity. Film's role in redefining museum engagement at Brera Ilaria Bollati, James M. Bradburne
103	7. Decolonizing design for cultural heritage and museums within a systemic change framework: discussing the participatory paradigm Eleonora Lupo
121	8. Accessibility design for museums. Synaesthetic communication tools Dina Riccò
137	9. The museum from the perspective of cultural proximity Ico Migliore
	PART 3 ART, DESIGN & CULTURAL INSTITUTIONS
153	10. Can cultural institutions in the field of architecture and design play a role in fostering social innovation? Qing Yu, Suzie Attiwill, Luisa Collina
171	11. Art and technology as tools for creating inclusive and sharing spaces Giulia Gerosa, Federica Guarnieri
185	12. Design cultures and digital humanities. The case of <i>Design Philology</i> Agnese Rebaglio, Laura Carugati
199	Annex I
203	Authors

Crafting tomorrow through the Design lens

Paola Cordera, Raffaella Trocchianesi

This volume aims to deal with systems of creativity and culture in their becoming and expression in the multiverse fields of design. In including theoretical and critical reflections, case studies, methodologies, technologies, tools and original practices, it aims to highlight the heterogeneous nature of such topics, considering creative and cultural industries as part of a broader design process fostering local growth and (re)activating audiences and communities while (co)creating cultural, economic and social values. It seeks to broaden the research approach, embracing a multi-disciplinary perspective and adopting a long-term and holistic approach (Battistoni, Giraldo Nohra, Barbero, 2019) to challenge and overcome the non-deferrable criticalities of the Anthropocene Age.

European calls support the importance of reinforcing *Audience Development (AD)* as a driver for stimulating people's interest in European cultural heritage as well as increasing access to it. AD aims to bring people close to culture; it is an incentive to find innovative models for cultural experiences; it diversifies and/or builds new audiences, boosts cultural diversity and reaches out to underrep-

resented groups. The AD strategy can target the development and diversification of the audiences or the intensification of the relationship with different audiences (see the Creative European Culture sub-programme: 2020 Cooperation Projects call). In 2016, the American artist and designer Neri Oxman proposed the *Krebs Cycle of Creativity* model, through which she described the current era of connection (2016): the link between art and design has a cultural impact on the behavioural dimension. The model consists of a conceptual map capable of describing knowledge transfers across the four modalities of human creativity (science, engineering, design and art).

Nowadays, we are witnessing a crucial transition: global society is facing a crisis, as are the productive cycles that have shaped it, which have also been condemned. The COVID-19 pandemic fostered this overall process, answering the call for change in several areas while prompting changes in stakeholders' individual and collective behaviour to connect while adhering to social distancing.

Furthermore, digital technologies have redefined the world of creative arts and media thanks to the integration of artificial intelligence (AI), which bridges the gap between designers and consumers, and unveils unprecedented possibilities in real and virtual domains to the benefit of a wide range of actors.

A *new era* is taking shape, with new forms of society, culture, economy and politics (Bonomi, Della Puppa and Masiero, 2016). A deep reflection on this crucial transformation will entail a re-vision of the concepts of *sustainable culture*, *inclusive sociality*, and *participation* in cultural heritage understood as a common good (Iaione, 2013). In 2018, the OECD's *Local Economic and Employment Development Programme* (LEED) entered into a partnership with the International Council of Museums (ICOM). Their aim was to develop a guide addressed to policymakers and the museum community, exploring areas with significant «potential for museums so that they could contribute to local growth, including economic development, urban regeneration and community development, education and creativity, and inclusion, health and well-being», building on a process that began in the 1970s.

The design approach will envision original models of sociality and new concepts of community (Sennet, 2020). Design, creativity,

culture, and creative industries are seen as drivers able to encourage this stage of experimentation, necessity of interaction, and continuous change (Vai, 2017). Indeed, design, creativity and creative and cultural industries are still essential motors capable of revamping the cultural system (cf. Creative Europe 2021–2027, Recovery Assistance for Cohesion and the Territories of Europe – REACT–EU, Future cohesion policy 2021–2027).

Therefore, the challenge consists in transforming creativity and culture into innovative processes, possibly defining measurable impacts through systems and indicators.

In this context of constant transformation, cultural institutions change roles and responsibilities (in terms of both museums and cities). Over time, museums generate a complex network of relationships and a strong influence on civil society – between memory and future, starting from a new system of symbols and a new semantics. The first edition of the *European Report of Cultural and Creative Cities Monitor* (2017) was updated two years later (Montalto *et al.*, 2019). This report envisages the monitoring of cultural and creative cities by analyzing a series of indicators measuring the *Cultural Vibrancy*, the *Creative Economy* and the *Enabling Environment* of a city.

Therefore, issues such as *accessibility*, *multiculturalism* and *inclusion* redefine the social and political positioning of the current cultural system.

The book is divided into three parts: (1) Territories & Local Development, (2) Museums, Exhibitions & Cultural Experience, (3) Art, Design & Cultural Institutions. Each part touches on the main issues of the book, highlighting different contexts, processes and approaches to the topic.

First, the scale of the territory opens to different design attitudes able to empower the potentiality of the cultural offer, in terms of both valorizing the historical identity and envisioning new ways to enjoy places. In the tourism field, topics such as sustainability and accessibility are defining new models for designing experiences, which has implications for designing the whole chain of this sector: infrastructures, hospitality, museums and communication strategy starting from a renovated perspective focused on social values. The link with the past is important in order to re-read the relationship between cultural

heritage and environment; it opens access to new narratives of the Italian design heritage, going beyond the boundaries of the traditional definition of cultural heritage. At the same time, the complex transformation of cities, landscapes and relationships between people of many cultures implies design attitudes able to accommodate multidisciplinary approaches.

Secondly, in this context, inevitably, the cultural experience in museums and temporary exhibitions assumes a new role: one moves from the concept of visit to one of experience, where audience participation and inclusion is the crucial point. A broadened meaning of inclusivity and accessibility implies improved ways to design museums and exhibit systems based not only on physical ergonomics, but also on multisensory features and synaesthesia. Herein, a new definition of and a new role for museums are required: a museum must be able to embrace several communication registers and languages to engage different visitor profiles; able to envision participatory processes to stimulate multicultural dialogues; able to renew its proxemics according to the emerging circumstances. At the same time, the logics underlying the temporary exhibit system are changing: a sustainable approach is required in order to face the huge problem of ephemeral equipment which is destined to be discarded as waste. This implies a complete change of mindset around this design field: different approaches, skills, and attitudes.

Finally, the relationship between art, design and cultural institutions, as well as the role of the latter, must be redefined according to new potential synergies. The social innovation approach – as a change process based on strategies to enable the social and economic development of a community – is the aim of several projects focused on new models of a sharing culture. This includes the advent of new technologies, some of which are directed towards new *functions* of the digital culture and digital humanities, in a context where multidisciplinary and disciplinary dialogue are at the core of the issue.

Authors

Giuseppe Amoruso: Civil Engineer, Associate Professor at Politecnico di Milano, Department of Design, from 2020, Scientific Habilitation as Full Professor, PhD in Drawing and Measured Drawing. He investigates CAD&BIM, heritage studies, and experimental museology. He is the author of 175 publications. Chair of INTBAU ITALIA, the International Network affiliated with the King's Trust in London, and of the project *Regenerating Amatrice*. An expert in cultural cooperation, he recently directed the *Program for the definition of a strategic plan for the improvement and the enhancement of the Folklore Museum, the Museum of Popular Traditions, and the site of the Roman Theatre in Amman (2023)*.

Suzie Attiwill: Professor of Interior Design at the School of Architecture & Urban Design, RMIT University, Australia. She holds a PhD (Architecture & Design), a Master of Arts (Design), and Bachelors' degrees in Interior Design & Art History. Since joining RMIT in 2000, Suzie has regularly taught undergraduate & postgraduate interior design students, and supervises practice research PhD Interior Design candidates in Australia, Europe, and Asia. Her research is conduct-

of design history and culture, and exploring effective methods for its dissemination.

Luisa Collina: Full Professor of Design at Politecnico di Milano, with a PhD in Architecture. Her teaching, research and practice are related to interior and service design, focussing on strategies, meta-design, and design-driven innovation. She has previously served as Dean (2016-2021) of the School of Design at Politecnico di Milano. In 2013 she was elected President of Cumulus, the International Association of Universities and Colleges of Art, Design, and Media, and remained in the role until 2019. Since July 2021, she has held a position in the Italian Ministry for University and Research: National Expert for Horizon Europe Cluster 2 – Culture, Creativity and Inclusive Society.

Paola Cordera: Associate Professor at the Politecnico di Milano. She was the Leon Levy Fellow at the Center for the History of Collecting, at the Frick Art Reference Library in New York (2016) and a visiting scholar at the American Academy in Rome (2023-2024). Building upon a multidisciplinary background developed over time through research projects and publications, her research interests include the history of art, decorative arts, and Design from a transdisciplinary perspective in museums and cultural heritage. She is currently the Principal Investigator on the VO Project *Voices of Objects. The Italian Design from Museum to Home* (2021-2024) focussing on the travelling exhibition *Italy at Work* (1950-1954) in the framework of post-war Marshall Plan funding in Europe.

Peter Di Sabatino: A licensed architect in California and has held senior positions in significant studios. Since 2016, he is a Professor at Politecnico di Milano teaching in graduate-level degree programs. His research focuses on creative, responsible, and resilient interventions in the city with an open, progressive, and comprehensive paradigm that engages place, time, modernity, and cultural heritage. Peter was previously Professor and Dean of the College of Architecture, Art, and Design at the American University of Sharjah in the UAE, and Professor and Chair of the Department of Environmental Design at Art Center College of Design in Pasadena.

This volume focuses on the dynamic systems of creativity and culture within diverse design fields, merging theoretical reflections, case studies, methodologies, technologies, tools, and original practices. Twelve essays underscore design's role in sustainability, emphasizing local growth, community revitalization, and the co-creation of cultural, economic, and social values. In today's global society, crises in productive cycles, amplified by COVID-19, have accelerated change and influenced behaviors. Digital technologies have transformed the media landscape, bridging the gap between designers and stakeholders and expanding possibilities in both real and virtual domains. As a new era emerges, this book revisits concepts like *sustainable culture*, *inclusive sociality*, and *participation* in cultural heritage as a common good. It proposes a holistic approach to the Anthropocene Age's challenges, highlighting creative industries' importance in local development and community engagement. By adopting multidisciplinary approaches, the volume seeks to inspire new models for cultural engagement and community development, contributing to a more inclusive and sustainable future. It redefines issues like accessibility, multiculturalism, and inclusion, reshaping the social and political positioning of the cultural system.
