/ EURAU NETWORK

EURAU is a network of schools and researchers in Architecture which meets biannually in a symposium to share their investigations. EURAU's primary goal is to establish a debate and discussion on contemporary discourses about Architecture, City and Environment. This is a committed action organized by universities that contributes to the European Strategy for the transition towards a sustainable and inclusive society. Initiated by the French Ministry of Culture, EURAU has been active since 2004 organizing ten international conferences by different Schools of Architecture in various European cities: Marseille (2004), Lille (2005), Brussels-Liège-Mons (2006), Madrid (2008), Napoli (2010), Porto (2012), Istanbul (2014), Bucharest (2016), Alicante (2018), Birmingham-Staffordshire (2020-21).

The Department of Architecture and Urban Studies of the Politecnico di Milano organises at the School of Architecture Urban Planning Construction Engineering (AUIC), EURAU Milan 2024 "IN-PRESENCE / THE BODY AND THE SPACE - The role of corporeity in the era of virtualization", the eleventh edition of the international conference, which takes place from 19 to 22 June 2024.

/ EURAU Milan 2024

11th INTERNATIONAL CONFERENCE

EUROPEAN RESEARCH ON ARCHITECTURE
AND URBANISM INTERNATIONAL CONFERENCE

IN-PRESENCE / THE BODY AND THE SPACE

The role of corporeity in the era of virtualization

For those who deal with the city and the territory, space refers to the body
(C. Bianchetti)

The EURAU Milan 2024 Conference aims to unpack the significance of corporeality in contemporary times and its relevance for the upcoming years. Specifically, the focus is on the relation between body and space and how this relates to architecture, the city and the environment, interpreted as physical facts and processes. Within the background of a technological turn, the focus is now on what has changed or will further change in this relationship and what, on the opposite, remains unalterable, inherently bound to the material and impervious to the virtual.

TABLE OF CONTENTS

16	MARCO BOVATI, ANNA MORO, DANIELE VILLA Spaces, Bodies, Design - A Multidisciplinary Perspective
21	/ COMMITTEES
25	/ KEYNOTE SPEAKERS
27	1 / CONCEIVED
29	ID002 NADIA AMOROSO Visualizing climate action in urban design and landscape architecture. Strategies and impact
33	ID005 JOSEP MONTAÑOLA, MARGARET KRAWECKA, MAGDALENA SAURA Architecture and corporeity. Towards a new concept of place-making
37	ID009 LAMIA ABDELFATTAH, MATTEO ARIETTI, ANDREA BALESTRINI, CHRISTIANE BURKLEIN, GIULIA CASTELLAZZI, DIEGO DEPONTE, ANDREA GORRINI, VIRGILIO DÍAZ GUZMÁN, ZAYNEB KADIRI, GIULIO MARZULLO, FEDERICO MESSA The anatomy of public space. A multidisciplinary perspective
41	ID010 JORGE RAMOS-JULAR, FERNANDO ZAPARAÍN-HERNÁNDEZ Body-space relations in Bill Viola's audiovisual scenographies
45	ID012 ZHENGWEN ZHU Approaching the playground. Spatial practices for the body
49	ID020 MARÍA REDONDO PÉREZ Products, atmospheres and interactions. Relations between the body and Light Art
53	ID023 DIANA SALAHIEH, LAYLA ZIBAR, IRENA FIALOVA Exploring narrative research methods for an embodied reading of Prague's walkability
57	ID025 DANIELA COPPEDE PACHECO CIONI COPPOLA Diagramming & mapping. The underlying system of architecture
61	ID028 ALESSANDRO DI EGIDIO Fighting technological alienation. Performing media as a sustainable practice of human-machine symbiosis

65	ID034	SARAH JAVED SHAH, LIHENG ZHU The [socio-cultural] production of space. Doorstep: Exploring threshold in non-western contexts
71	ID035	FRANCESCA BERNI The weather body, the water space. Exploring the landscape as technological environment
75	ID040	CIGDEM AKIFOGLU, PELIN DURSUN ÇEBİ Bodily experiences on paper space. Imaginary narratives
79	ID041	BEATRICE LAMPARIELLO, SILVIA GROAZ From object to subject. The body architecture of Hans Hollein
83	ID042	LAURA SUIVERI The silent body. Exploring the neglected nexus of type, materiality, and human perception in Carlos Martí Aris
87	ID044	INÊS SALGUEIRO, RUI AMÉRICO CARDOSO, LUÍS S. VIEGAS On the importance of the body's experience in space and the act of drawing for the architectural conceiving process
91	ID046	MARIO COPPOLA Coexistence: The goal of architectural composition now. Architecture as trespassing tool to embrace culture, body, Earth
95	ID047	ANNA PROSKURIAKOVA Reimagining interaction between Industrial heritage and human bodies. Revitalization of post-industrial areas as an opportunity for small and medium-sized Italian cities
99	ID048	NILSU ALTUNOK, PELIN DURSUN ÇEBİ Looking at the city from our body through the "Walkers' Handbook or a Walking Lexicon"
103	ID049	MINGYUE ZHANG, JIN BAEK The body in architectural experience. Merleau-Ponty's phenomenology interpreting the strolling spaces of traditional oriental gardens
107	ID050	ANTÔNIO FREDERICO LASALVIA Paxton after Paxton: Form as formlessness in the dance of architecture
111	ID055	ROBERTO PODDA Eye-foot-hand. Actuality of a phenomenology of bodily life in the "exponential" space
115	ID060	GAMZE SENSOY Tracing the experience through the metamorphosis of body-space relationship
119	ID063	ZÜMRÜT SAHİN The artist's studio unveiled. Exploration of practice, body, and space
125	ID067	RAFAËL MAGROU Re-composing the theatrical space from the fourth wall
129	ID068	FRANCESCA CASALINO Dancing bodies. Anna Halprin and her workshops at Dance Deck and beyond
133	ID071	EZGI SELİN KARADEM, ET AL. How do we use our bodies to investigate our surroundings? Deciphering the individual and collective narratives of the architects
137	ID072	BEATRICE-GABRIELA JÖGER Between virtual and corporeality. Challenges in experiencing architecture today
141	ID073	ELİF CEMRE ÇELİKCAN Spatial cognition and representation of a verbally experienced environment. A study on preschool children's spatial construction through drawing
145	ID074	GEON-IL LEE, JIN BAEK Questioning the meaning of 'atmospheric'. A foundational study on climatic approach to 'atmosphere'

Addressing vulnerability through place-based knowledge and co-design practice ^[1]

Key Words

Vulnerability, Disaster risk reduction, Architectural ethnography, Co-design, Education

Overview

Vulnerability is a characteristic shared by human beings and the space they inhabit: bodies and places are, by their nature, constantly exposed to events that can alter their physical condition and cause biological, social and economic consequences. While there is an analogy between the vulnerability of bodies and places, there is also a clear cause-and-effect relationship whereby the fragility of the territory makes the condition of those who inhabit it vulnerable; similarly, the construction of places by man can also make them exposed to risks of any kind. The relations between architecture and anthropology [2] take on a clear significance beginning in the 1950s, with the emergence of a critique toward functionalist architecture by architects who were also very different from each other, such as, for example, Aldo van Eyck and Aldo Rossi [Bilò 2019, p. 1]. In this regard, Giancarlo de Carlo claimed that the “purpose of architecture is not to produce objects but to give organization and form to the space in which human events take place” [3]. This makes anthropology, as a discipline that observes, understands, and interprets the physical and social environment of humans, the privileged cognitive tool of the link between space and humans by breaking the fence of disciplinary knowledge and practices of architecture. The use of ethnographic practice serves to question the specialized knowledge of architects to learn from the “bastard conscience” what needs to be translated: the organization of space [Bilò 2019, p. 146].

In recent years, the role of practices that bring architecture and anthropology together has become increasingly relevant in the design of vulnerable places for Disaster Risk Reduction (DRR) and Disaster Risk Management (DRM), involving urban and spatial development policy agencies on the one hand, and the work of architects and organizations engaged in emergency prevention or management projects on the other. On the level of policy initiatives, the Sendai Framework (2015-2030) developed by the United Nations Office for Disaster Risk Reduction

(UNDRR) and adopted by the UN state members, defines four priorities that contain goals and target actions that often need an active role of the population: (1) understanding disaster risk, (2) strengthening disaster risk governance to manage disaster risk, (3) investing in disaster risk reduction for resilience, (4) enhancing disaster preparedness for effective response and to “Build Back Better” in recovery, rehabilitation and reconstruction [UNDRR 2015, p. 14]. In particular, the second priority expresses the need to understand disaster risk in all aspects: vulnerability, capacity, exposure of people and assets, hazard peculiarities, and the environment, including promoting communication and education activities. The fourth priority suggests actions for community involvement in preparedness with a focus on empowering women and persons with disabilities to avoid gender inequalities and promote universally accessible responses, as well as the desirability of measures to “Build Back Better” and community involvement in participatory decision-making processes.

One of several manuals and toolkits inspired by the Sendai framework is the “City Resilience: Action Planning Tool” [UN-Habitat 2015], which aims to make it possible for neighborhoods or districts of larger cities or metropolitan areas, as well as local governments of small to medium-sized cities, to organize and carry out effective measures to increase the resilience of their cities. The CityRAP tool offers a method to coordinate municipal authorities, communities, and local stakeholders in a step-by-step participatory planning that includes a set of training exercises and activities with the aim of enhancing urban resiliency. The development of the participatory process implemented by the tool takes about two to three months and is divided into four stages: (1) understanding Urban Resilience, (2) data collection and organization, (3) data analysis and prioritization, (4) development of the City Resilience Framework for Action (RFA). The tool is based on the principle of bottom-up planning, which includes engaging stakeholders, communities, and citizens from the beginning through participatory risk mapping activities, focus group discussions, and cross-sectoral action planning.

A perspective on architectural design

From the perspective of design practices, the relationships between anthropology and architecture as a tool of DRR and DRM are visible in the work of architects such as Atelier Bow Wow and Yasmeen Lari. From the second half of '900, Tokyo started a process of radical urban transformations, reflecting a mix of Japanese and Western culture. In this context, the atelier bow wow, established by Yoshiharu Tsukamoto and Momoyo Kaijima, begins to observe buildings that are defined by accidental conditions or needs of their occupants. The survey was published as a guidebook titled *Made in Tokyo* [Kaijima et al. 2001]; it illustrates by drawings the peculiarity of those living spaces composed of aggregations of different functions and elements that accommodate their inhabitants' livelihoods. After the 2011 Great East Japan earthquake disaster that caused the tsunami and the meltdown of the Fukushima Nuclear Power Plant, Momoyo Kaijima was part of the organizing committee of ArchiAid, a network of 300 architects and 16 university laboratories involved in post-disaster rehabilitation. Addressing the reconstruction plan of the coastal region of Ishinomaki-shi, they made a field survey, interviewing the village residents about their daily life and mapping the landscape and things that disappeared to figure out the reason for the destruction and make drawings of the lost spaces. The result was a collective drawing that linked the past, the present, and the future. In “A Pattern Book for Oshika Peninsula” [ArchiAid Oshika Peninsula Supporting Seminar, 2011-12], they showed the possibility of a new life in villages and a catalog of new elements needed for reconstruction. This method of putting together different pieces in one's memory could be called “Architectural Ethnography” [Kaijima 2018].

In 1980, Yasmeen Lari co-founded the Heritage Foundation of Pakistan, a not-for-profit organization engaged in research, publication, and conservation of cultural heritage to promote social integration, peace, and development. After the 2005 earthquake in the Kashmir region and the 2011 flood that devastated rural villages and beyond, Lari worked for the reconstruction and resilience of communities by engaging them in a self-help approach. Using traditional construction techniques is one of the key elements of Lari's work as it combines cultural values, empowerment of women and communities, and the use of zero-carbon construction processes. These technical solutions were outlined in the manual “DRR-Compliant Sustainable Construction, ‘Build back safer with vernacular methodologies’ Technical Support Program” [Lari 2011] through which artisans could be involved and trained for settlement rehabilitation and reconstruction. In the field of education, the “Disaster Preparedness Manual” and “Disaster Preparedness and Management” DVD [Lari et al. 2013] were additional tools of risk prevention realized in both English and Urdu for a broad understanding. The handbook includes illustrations and photographs that make clear the steps that should be followed “before, during, and after” the disaster so that people may understand and share the information. In the work of Lari, the knowledge of the place and the in-depth study of the past reveal its modernity [Corradi 2021] and the opportunities for human survival in the contemporary world.

Conclusion

In conclusion, before or after a disaster, vulnerable places must be understood by the nature of the territory and the relationships between the place and the community living there. Risk reduction strategies adopted by policymakers identify place-based knowledge and participatory processes as key elements that challenge architects' disciplinary expertise. The work of Atelier Bow Wow and Yasmeen Lari shows the advantages of a new relationship between architecture and anthropology. On the one hand, ethnographic observation makes it possible to (re)construct the narrative within which architecture exists: a landscape of memory that unites habits, livelihoods, and a sense of place. On the other hand, community involvement through education, participatory decision-making processes, and the recovery of traditional building techniques to "Built Back Better" is an empowerment tool that ensures the survival of the culture and economy of communities inhabiting vulnerable places in the future.
