The XV International Symposium on Computer Simulation in Biomechanics will be held **July 9th-11th 2015**, the weekend leading up to **ISB 2015**, in Edinburgh, UK.

On July 9th 2015 from 11am to 6.30pm there will be a workshop on Optimal Control. For more information see the workshop flyer. You will need a valid Matlab licence for your own laptop. Please see the flyer for more details.

### TGCS Goals

- Joining together ISB members particularly involved in computer simulation.
- Providing a forum for extensive exchange of information related to new computer simulation approaches in biomechanics (methods, software, hardware and applications).
- Formulating standardized terminology of computer simulation in biomechanics.

The symposium will be a scientific and technical meeting for investigators and students in all areas of computer simulation in biomechanics, especially human movement, motor control, and robotics related to biomechanics.
