WELCOME FROM THE ORGANISATION COMMITTEE	4
PRESENTATION OF THE DIVISION OF LANDSCAPE ARCHITECTURE AT SLU UPPSALA	5
WELCOME NOTE FROM ECLAS	8
CONFERENCE SCHEDULE	9
PLENARY SESSIONS 1–4	10
CONFERENCE TRACKS	14
ABSTRACTS	15
CONFERENCE TRACK: CLIMATE CHANGE AND ADAPTATION	15
CONFERENCE TRACK: CULTURAL LANDSCAPE	22
CONFERENCE TRACK: DESIGN HISTORY, THEORY AND METHODS	34
CONFERENCE TRACK: EDUCATION AND PEDAGOGY	42
CONFERENCE TRACK: GREEN LANDSCAPES AND LIVING	52
CONFERENCE TRACK: OUR FIELD AND PROFESSION—UNDERSTANDINGS, ROLE AND FUTURE	62
CONFERENCE TRACK: SOCIETAL CONTEXT	72
CONFERENCE TRACK: URBAN AND RURAL	81
INDEPENDENT SESSIONS	87
EXHIBITIONS	92
CONTRIBUTOR INDEX	96

I have understood, that the process is what matters to me the most. Following that, during my scholarship in Estonia, I have been exploring the process of vernacular landscapes creation by citizens

of Tartu. I have been documenting places, forms, actions, and meanings of small scale bottom-up interventions in the city. Then I have created a typology of them.

365. Emotional Landscapes: A twenty-year-long dialogue

LUCA MARIA FRANCESCO FABRIS, Politecnico di Milano/ Beijing University of Civil Engineering and Architecture, lucamariafrancesco.fabris@polimi.it | MENGYIXIN LI, Beijing University of Civil Engineering and Architecture, limengyixin@bucea.edu.cn

Topic: A celebration of the European Convention of Landscape. Adopting the form of a dialogue, the written contribute will express the impressions coming from a series of pictures whose value change from merely evocative to be a basis for an open discussion about the contemporary landscape. Any image hides an inner meaning that brings the discussion, sometime friendly sometime deeply academic, to explore unexpected aspects in some way related to ECL. Context: Despite ECL to be the provoking starter

of the dialogue, the theatre of the discussion is the world and the multilayer aspects of landscape architecture: from method, to theory, to examples and techniques all evoked by emotional imagines. Importance: Two nationalities, two different backgrounds, teaching and researching in Landscape Architecture as a common passion. Authors replicate in this contribution the way they built up their scientific collaboration and friendship: a witness embracing 20 years of our life.

PARALLEL SESSION 8

[TUESDAY 14 SEPTEMBER 16.30–18.00 CEST]

THEME Update the Past: Archives of landscape architecture in the digital era

THEMATIC ROUNDTABLE

316. Update the Past: Archives of landscape architecture in the digital era

SOPHIE VON SCHWERIN, Hochschule für Technik Rapperswil, sophie.vonschwerin@ost.ch | LILLI LIČKA, Universität für Bodenkultur Wien, lilli.licka@boku.ac.at | ULRIKE KRIPPNER, Universität für Bodenkultur Wien, ulrike.krippner@boku.ac.at | ANNEGRET DIETZE-SCHIRDEWAHN, Norwegian University of Life Sciences, annegreth.dietze@nmbu.no | SIMON ORGA, Hochschule für Technik Rapperswil, simon.orga@hsr.ch

A practical base to stop and think are landscape architecture archives. They not only collect documents, but also preserve knowledge and, thus, are the basis to continuously develop the profession. At the ECLAS Conference 2019 in Ås, we founded the Network of European Landscape Architecture Archives (NELA). In our monthly meetings we discuss current topics, we write papers, and elaborate research projects. At the ECLAS 2021 we would like to open up the discussion to the public on yet another topical

challenge: archives in the digital era. 1) Public access: Archives are present in teaching, research, practice and community services and thereby foster professional discourse. 2) Digitisation: Our stocks are fragile and should be digitised to minimise damage and improve access. 3) Digital collection: Today's collections are of digital nature and ask for new ways of storage and retrieval. 4) Standards to assure quality in collecting and distributing data.
